Total	4,292	11,343	37.8%	6,144	15,680	39.2%

Notes: AOD episode of care entering mandated services (Total), includes:

- teams mandated to collect ADOM⁴

¹ There are small numbers of eligible NGOs currently in Nelson Marlborough district area. It is not possible at this point to disaggregate AOD tāngata whai ora in integrated mental health teams for Hutt Valley District. Wairarapa District the services are delivered by NGOs.

² Teams within NGOs are assigned to a Health New Zealand district area.

³ Health New Zealand Northland data is incomplete from Apr to September 2025.

⁴ Some teams in the list are excluded. This is because the team is coded as a community mental health team, and AOD only referrals cannot be differentiated.

- team type of alcohol and drug team or a co-existing team
- tāngata whai ora aged 18 years and over
- referrals with an in-scope contact. Excludes activity settings: WR, PH, SM, OM and exclude activity type: T08, T32, T35, T46, T47 and T49. The activity type is a contact
- referrals joined together to make an episode of care if they overlap or have 14 days or less between referral end and referral start
- episodes of care which start in the period of the report.

Treatment starts are within the episode of care and include only episodes of care with a treatment start ADOM collection including assessment only (RC13, RC14, RC15) in analysis (ADOM).
