HoNOS family completion report, April to June 2026

The following table provides information on the latest completion reporting for the HoNOS family of measures for all Te Whatu Ora Districts. The HoNOS family of measures includes HoNOS, HoNOSCA, HoNOSI, HoNOS65+, HoNOS LD and HoNOS secure. The collection rate recommended by the Manatū Hauora, Ministry of Health is 80%+ for both inpatient and community collections. This collection could be an assessment only, admission, review or discharge collection.

The term 'completion' is used to describe the rate that outcome collections are being recorded for service users in accordance with the collection protocol. The protocol requires that an outcomes collection is completed at the start and end of an episode of care, in either inpatient or community settings, and at three monthly intervals (that is reviews) within an episode of care where this is greater than (>) three months.

Definitions

Unique tāngata whai ora = count of unique tāngata whai ora who had at least one in scope activity in the reporting period.

Tāngata whai ora with at least one outcome collection = count of tāngata whai ora seen who had at least one Collection Occasion record in the reporting period.

Team setting: Inpatient team setting = I, community team setting = all others.

In scope activity = Activity Type Code all except T08, T15, T16, T17, T18, T19, T20 T32, T35, T33, T37, T43, T44, T45, T46, T47, T49, T50, T52 AND Activity Setting Code all except WR, PH, SM, OM.

Team Type Code all except for 03, 11, 17, 24, 26.

Note: *Northland district data is incomplete for the Jan to Mar 2026 and Apr to Jun 2026 periods.*

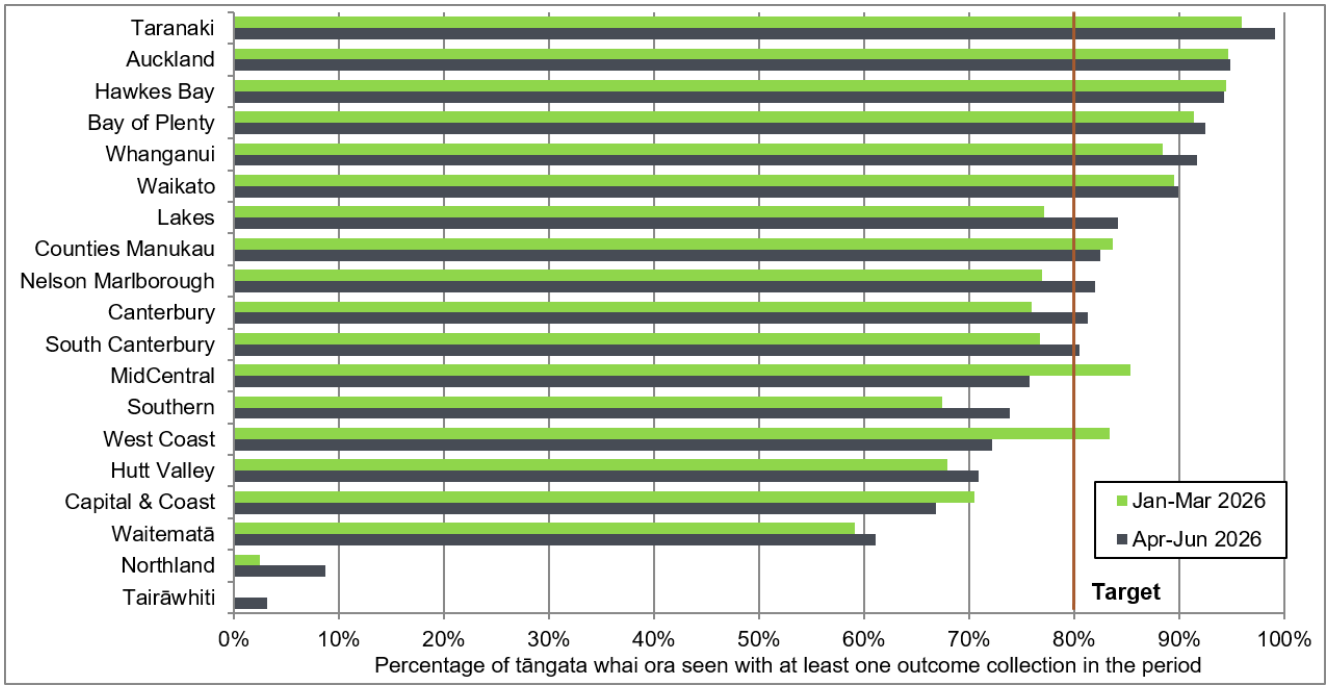

The outcome collection need to be valid. HoNOS, HoNOS65+, HoNOSCA, HoNOSI and HoNOS LD - a valid collection has two or fewer items unknown or missing. For HoNOS secure - a valid collection has one or fewer missing items for first twelve items and one or fewer missing items for the secure items. For all tool types - collections where the reason for collection code is RC09, RC10, and RC11 (discharge – lost to care, deceased, brief episode of care) the collection can be invalid as no outcome measure can be collected.

Note 1: This report identifies only whether a single collection has been recorded for a service user who has had an activity with Te Whatu Ora District. It does not indicate whether collections are completed at appropriate times or intervals. Alcohol and Drug Teams are excluded from this report.

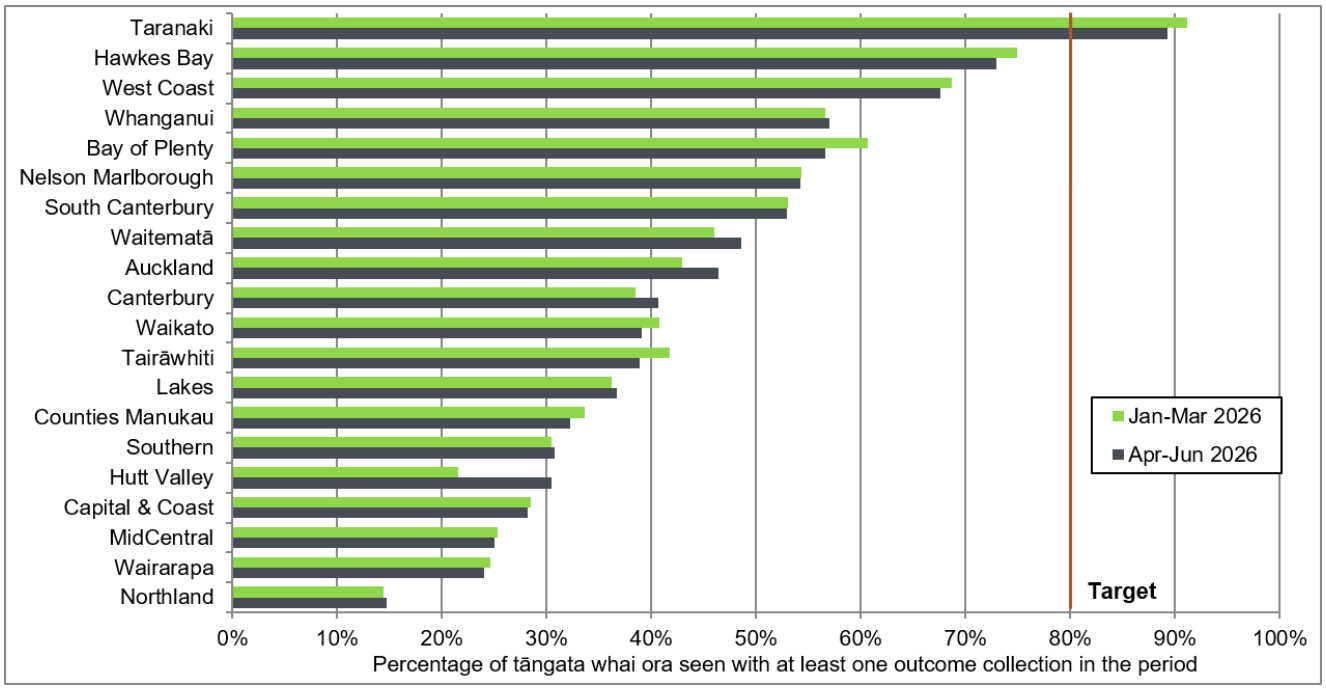

Note 2: The information contained in this report has been derived from the PRIMHD database. It only reflects what is in the data set at time of extract.

Percentage of all DHB service users seen with at least one outcome collection, by setting, January to March 2026 and April to June 2026
