

HoNOS family completion report, Apr – Jun 2021

The following table provides information on the latest completion reporting for the HoNOS family of measures for all the DHBs. The HoNOS family of measures includes HoNOS, HoNOSCA, HoNOS 65+, HoNOS LD and HoNOS secure. The collection rate recommended by the Ministry of Health is 80%+ for both inpatient and community collections. This collection could be an assessment only, admission, review or discharge collection.

The term 'completion' is used to describe the rate that outcome collections are being recorded for service users in accordance with the collection protocol. The protocol requires that an outcomes collection is completed at the start and end of an episode of care, in either inpatient or community settings, and at three monthly intervals (that is reviews) within an episode of care where this is greater than (>) three months.

Definitions

Unique clients = count of unique clients who had at least one in scope activity in the reporting period.

Clients with at least one outcome collection = count of unique clients seen who had at least one Collection Occasion record in the reporting period.

Team setting: Inpatient team setting = I, community team setting = all others.

In scope activity = Activity Type Code all except T08, T32, T35, T33, T37, T46, T47, T49, T50 AND Activity Setting Code all except WR, PH, SM, OM.

Team Type Code all except for 03, 11, 17, 24, 26.

The outcome collection need to be valid. HoNOS, HoNOS65+, HoNOSCA, and HoNOS LD - a valid collection has two or fewer items unknown or missing. For HoNOS secure - a valid collection has one or fewer missing items for first twelve items and one or fewer missing items for the secure items. For all tool types - collections where the reason for collection code is RC09, RC10, and RC11 (discharge – lost to care, deceased, brief episode of care) the collection can be invalid as no outcome measure can be collected.

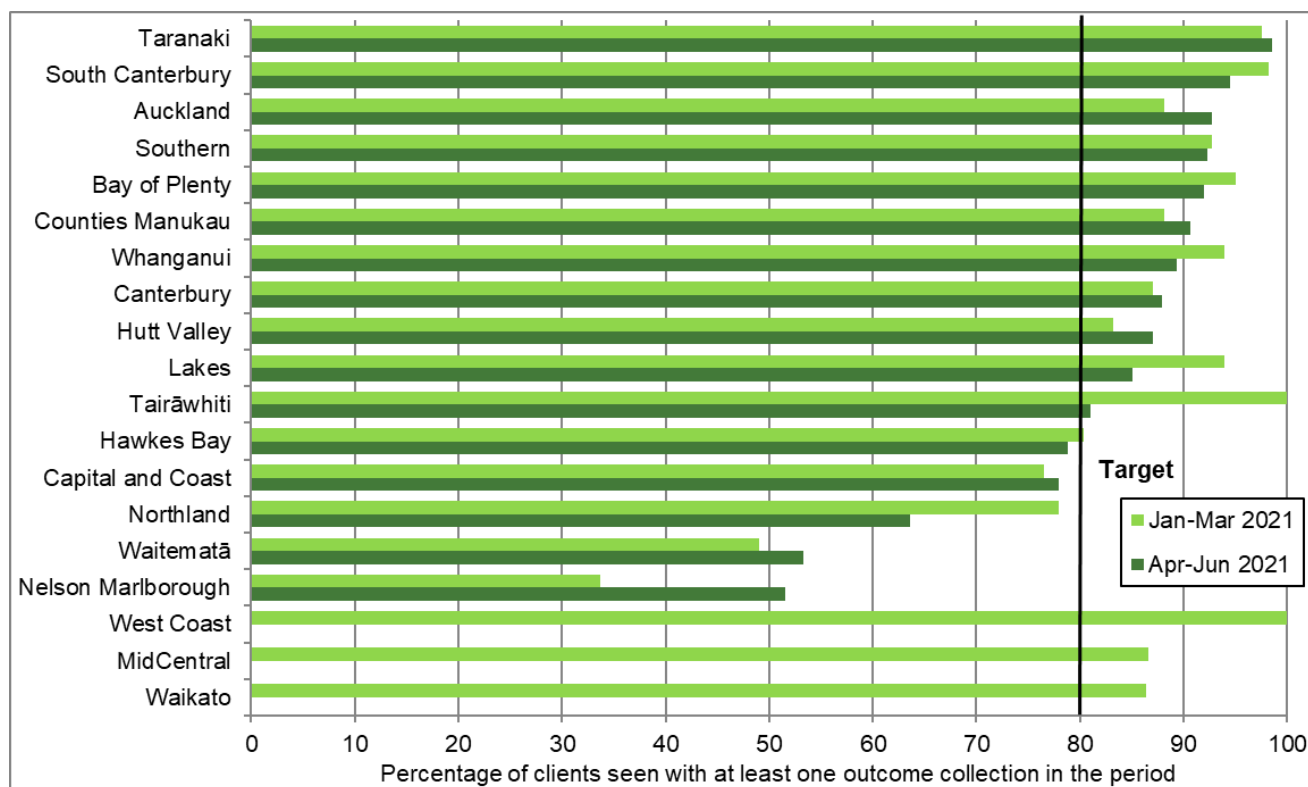

Excluded: *MidCentral, Waikato and West Coast DHB had incomplete data for the period Apr -Jun 2021.*

Note 1: This report identifies only whether a single collection has been recorded for a service user who has had an activity with the DHB. It does not indicate whether collections are completed at appropriate times or intervals. Alcohol and Drug Teams are excluded from this report.

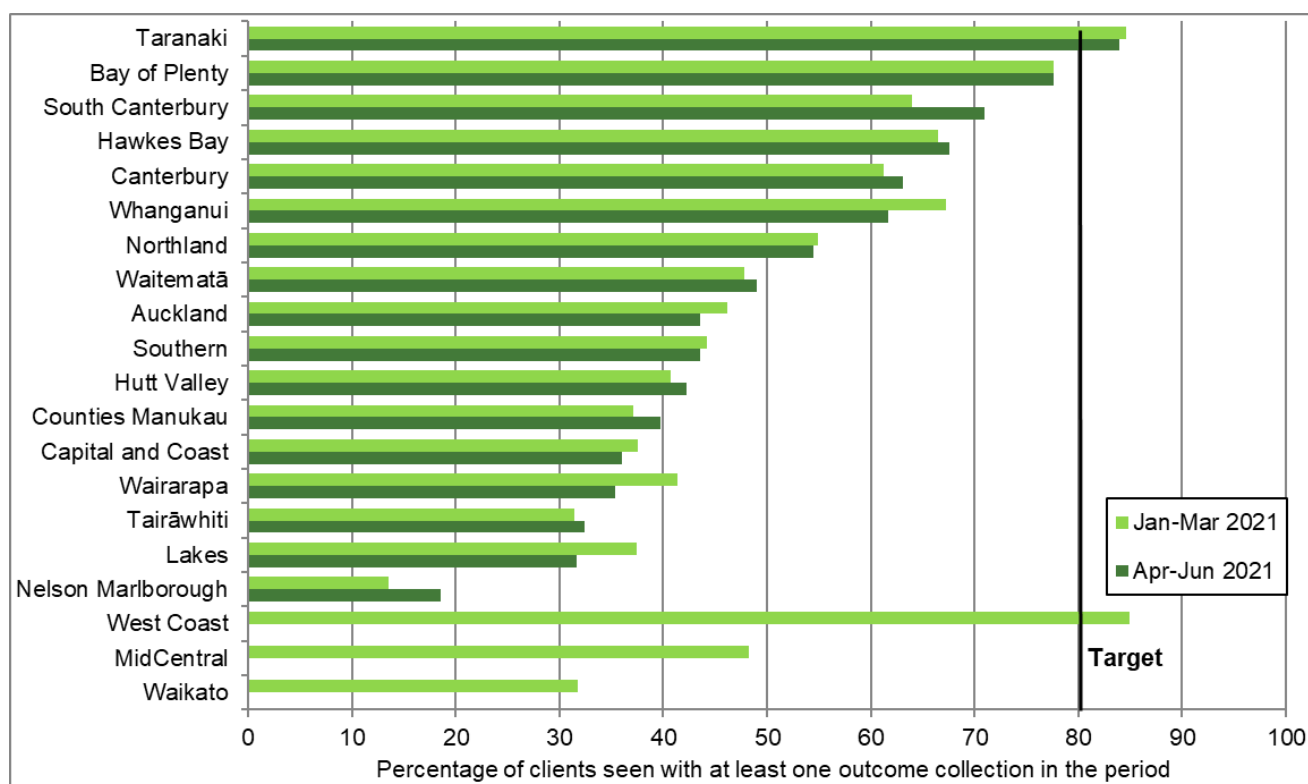

Note 2: The information contained in this report has been derived from the PRIMHD database. PRIMHD is a living data collection, which continues to be revised and updated as data reporting processes are improved. While the Ministry of Health has taken all reasonable steps to ensure that the information contained within the report is accurate and complete, it accepts no liability or responsibility for the manner in which the information is subsequently used or relied on.

Percentage of all DHB service users seen with at least one outcome collection, by setting, January – March 2021 and April – June 2021
